Nuclear Engineering and Design 142 (1993) 353–354
North-Holland

Contents of Volume 142

CONTENTS OF ISSUE 142(1)

Extended and Updated Selected Papers presented within Division G on FRACTURE MECHANICS AND NON-DESTRUCTIVE EVALUATION during SMiRT-11, August 18–23, 1991, Tokyo, Japan

Preface, *G. Yagawa* ix

Design and calibration of leak detection systems by thermal hydraulics and fracture mechanics analyses, *G. Bartholomé, W. Kastner and E. Keim* 1

Evaluation of crack opening times and leakage areas for longitudinal cracks in a pressurized pipe. Part I. Model for maximum leak areas and its validation, *S. Bhandari and J.C. Leroux* 15

Evaluation of crack opening times and leakage areas for longitudinal cracks in a pressurized pipe. Part II. Application of proposed model and fracture dynamics, *S. Bhandari and J.C. Leroux* 21

Elastic-plastic defect assessment based on ductile fracture process, *Y.M. Dong, W. Yang and K.C. Hwang* 27

Applications of probabilistic fracture mechanics to FBR components, *K. Hojo, M. Takenaka, H. Kaguchi, G. Yagawa and S. Yoshimura* 43

Analysis of stable crack growth across welded fusion line: Japanese round-robin, *M. Kikuchi, S. Yoshimura, S. Aoki, T. Nishioka, N. Nakagaki, N. Miyazaki, N. Mukaimachi, S. Sasaki, T. Shimakawa, T. Watanabe and G. Yagawa* 51

Development of elastic-plastic integrity evaluation system for pressure vessel and pipings, *Y.J. Kim, S.H. Son, J.B. Choi and H.D. Chung* 61

Validation of room-temperature primary creep crack-growth analysis for surface-cracked pipes, *B.N. Leis and F.W. Brust* 69

Evaluation of flawed piping under dynamic loading, *R.E. Nickell, D.F. Quiñones and J. Gilman* 77

Application of probabilistic fracture mechanics to optimize the maintenance of PWR steam generator tubes, *P. Pitner, T. Riffard, B. Granger and B. Flesch* 89

Fracture criterion of a mixed-mode crack based on CED (Crack Energy Density), *T. Utsunomiya and K. Watanabe* 101

Instructions to contributors 113

CONTENTS OF ISSUE 142(2&3)

Extended and Updated Selected Papers from the
EIGHTEENTH WATER REACTOR SAFETY INFORMATION MEETING
Rockville, Maryland, USA, October 22–24, 1990

Preface, *K. Kussmaul* i

Heavy-Section Steel Technology Program Overview, *W.E. Pennell* 117
Dependent failure analysis of NPP data bases, *S.E. Cooper, E.V. Lofgren, P.K. Samanta and S.-M. Wong* 137
Probabilistic methods for condition assessment and life prediction of concrete structures in nuclear power plants, *B.R. Ellingwood and Y. Mori* 155
Incorporation of passive components aging into PRAs, *J.H. Phillips, W.S. Roesener, H.L. Magleby and V. Geidl* 167
Research and development at the Structural Materials Information Center, *C.B. Oland, D.J. Naus and E.G. Arndt* 179
Identification and assessment of containment and release management strategies, *J.R. Lehner, C.C. Lin and P. Neogy* 189
Interfacing Systems LOCA (ISLOCA) component pressure capacity methodology and typical plant results, *D.A. Wesley* 209
U.S. NRC Accident Management Program, *L.M. Shotkin* 225
Consideration of external events in the individual plant examination program, *J.T. Chen* 231

Regular Papers
Risk assessment in setting inservice inspection priorities at Light Water Reactors, *T.V. Vo, B.F. Gore, F.A. Simonen and S.R. Doctor* 239
Heavy-Section Steel Technology Program: recent developments in crack initiation and arrest research, *W.E. Pennell* 255
Formulation of dynamic stability of fluid-filled shells, *K. Tsukimori, W.K. Liu and R.A. Uras* 267
Dynamic stability characteristics of fluid-filled shells under multiple excitations, *K. Tsukimori, W.K. Liu, Y.H. Tsao and R.A. Uras* 299
Evaluation methodology for seismic base isolation of nuclear equipments, *K. Ebisawa and T. Uga* 319
An overview of the ORNL/NRC program to address aging of concrete structures in nuclear power plants, *D.J. Naus, C.B. Oland, B. Ellingwood, Y. Mori and E.G. Arndt* 327
Interfacial area density, mean radius and number density measurements in bubbly two-phase flow, *S. Kalkach-Navarro, R.T. Lahey, Jr., D.A. Drew and R. Meyder* 341
